SUMMARY

Highly skilled and motivated JavaScript Developer with 2+ years of experience in designing and developing enterprise-level applications. Seeking a challenging position in a company to leverage my expertise in **JavaScript, React, Next.js, TypeScript** and various frameworks to contribute to the company's success.

SKILLS

Programming and JavaScript Technologies: **JavaScript, React, Next.js, TypeScript**

Database Systems: **MongoDB, MySQL**

Other Technologies: **GitHub, JIRA**

EXPERIENCE

Senior Frontend Developer

CostaCloud - An Appolo Computers Pvt. Ltd

Sep 2022 - Present, Okhla Industrial Estate, New Delhi

- Developed various object-oriented and web-based enterprise applications using **JavaScript** through the complete System Development Life Cycle (SDLC).
- Proficient in n-tier application design and development using **React, TypeScript and Next.js**, ensuring a responsive and efficient user interface.
- Created comprehensive **flowcharts** to map out application workflows, before initiating development, enhancing clarity and project direction.
- Assisted fellow developers in resolving frontend issues, providing guidance, mentorship, offering best solutions and best practices for complex challenges.
- Conducted rigorous debugging to resolve issues in the codebase, ensuring optimal application performance.
- Collaborated seamlessly with team members using **GitHub** for version control and efficiently managed project tasks through **JIRA**.

PROJECTS

Confidential

1. Personal Application (PA)

- An application that allows users to create **personal application** with document editing, uploading, annotating with a dedicated pdf viewer and a document editor. The created document then can be sent to any other users registered on the application
- The application also contains other features like **dashboard, inbox, outbox, cabinet**.
- Integrated **advance search** with backend **Elastic Search** for text-based searching on documents with text highlighting.

2. Paperless Eoffice 2.0

- Created an application for the client to replace their **document, Dak, File** transferring process from being done manually to now being done through our application.
- The application contains features like **Dak, File** which can be sent to multiple users simultaneously.
- A dedicated **admin portal** to manage users, roles and departments registered on the application with licence feature

PERSONAL PROJECTS

1. My-Jbook

- A command-line interface (CLI) based application that will fire up a React web application that **transpiles and bundles code** especially **JS and JSX**, allowing users to view the output in a dedicated preview window. It provides a platform to add code descriptions or notes, write code snippets and immediately visualize the output
- The technologies used are **React, Typescript, Esbuild, Lerna, Node, Express**.
- Run the application through cli by command **npm my-jbook serve**

EDUCATION

Bachelor of Science (Hons) in Computer Science

Bhaskaracharya College of Applied Sciences (Delhi University), Sector 2, Dwarka, New Delhi, 2022
